## **OFFERTE DI LAVORO**

### *Postdoctoral position*

*University of Lyon 1, Lyon-Bron, France*

A two-year post-doctoral position, funded by the French National Research Agency (ANR) and starting in February 2007, is available in the Laboratory "Espace et Action" (INSERM UMR 534 - University of Lyon 1, France, research team of Dr. Denis PéliSSon) to study the neuronal bases of sensory-motor adaptation processes in Humans. An emphasis will be given to the identification of brains regions and neuronal signals underlying the adaptation of quick (saccadic) eye movements. Approaches will combine behavioural analyses coupled to the use of different imaging techniques (fMRI, TMS). The laboratory hosts an interdisciplinary community and several facilities such as high speed visual displays and eye trackers, TMS system coupled to frameless stereotaxy and extensive computing infrastructure. The laboratory also has access to brain imaging facilities: one research-dedicated 1.5 T fMRI scanner with high-speed eye tracker, positron emission tomography (PET), whole-head magnetoencephalography (MEG). The successful candidate should be highly motivated and have a Ph.D. in Behavioral or Cognitive Neuroscience with a strong background in motor control and visual perception. Preference will be given to applicants possessing additional experience in functional MRI and TMS, and computer programming.

The deadline for submission is December, the 31<sup>st</sup>, 2006.

Applicants should submit a curriculum vitae, including a list of publications, a statement of research interests and two letters of recommendation to be sent to the address below. To receive full consideration application materials should be e-mailed by the deadline to: Denis PéliSSon (email: [pelisson@lyon.inserm.fr](mailto:pelisson@lyon.inserm.fr)); full address: Espace et Action, INSERM U534, 16 av. du Doyen Lépine, 69676 Bron cedex, France. Tel. 33 (4) 72 91 34 17; Fax. 33 (4) 72 91 34 01.
